MAKE ALL YEAR

With the hub removed, the steering wheel  
right off and your car will look a little better.

After the airbag module is removed,  
the steering wheel hub is removed.  
The hub is a 16 mm hole. The  
hub is the hole and drive member.  
You don't want to damage any of  
the parts. You can see the spline  
mark on the hub. The spline  
mark is on the steering wheel and

There are two connectors left at  
the wheel as shown at the right.  
The smaller connector is shown by the  
arrow. The smaller connector  
can be pulled right out without
