

CURRENT

BMW HU - **BASE STEREO** - 4 channel - 6 speaker, No Amp.

2 x 4" Front door, 2 x 4" Rear stage, 2 x 6.5" subwoofer under seats.

Subwoofer wired in parallel with front door speakers. & hot glued.

No AMP or any existing wire harness in Trunk.

2011 BMW 328i xDrive Sedan - Model PK63 E90 (with NAV - CCC).

VIN - WBAPK5C59BA654275 - note - run flats - room in well for amplifier.

PROPOSED - No change to BMW - HU.

2 x 4" Morel - IR-BMW4 100 Wrms - Component 2 way - **front door** - add tweeter to window frame.

2 x 4" Morel - IR-BMW4 100 Wrms - Component 2 way - **rear stage** - add tweeter to rear stage.

2 x 8" Jelnert XE 200R subwoofer or maybe Morel IP-BMWSUB82 - **under seat**.

New 6 channel Amplifier, add power, and new direct wiring to all speakers. Better wire quality and lower awg.

Options - (1) **AC D.6.1200**, (2) **JLA VX600/6i**, (3) **Helix M SIX DSP**

This is a costly upgrade or maybe just right for what I want - All about full range, precision & quality.

With these amplifiers - can I adjust output watts to match speakers?? When Wrms is less than amp channel?
